**COFFEYVILLE RESOURCES REOPENS SOME OFFICES AT REFINERY, FERTILIZER PLANT  
FLOODWATERS RECEDING AS DAMAGE ASSESSMENT CONTINUES**

COFFEYVILLE, Kan. (July 4, 2007) – Coffeyville Resources began moving back into its administrative facilities and some warehouses today at its refinery and fertilizer plant, as water from weekend flooding slowly recedes.

Part of the facility remains under water, and the company cannot comprehensively assess the damage until it subsides.

“We will not resume operations at either facility until it can be done safely,” said Jack Lipinski, chief executive officer of Coffeyville Resources. “Once we know the extent of the damage, we will have a better idea of when we might be able to restart the facilities.”

Company officials also announced Wednesday:

- Overflow of crude oil from the refinery’s main storage tank has stopped. Company officials are investigating the incident to determine the root cause of the spill and to determine the amount of crude oil lost during the flood.
- Coffeyville Resources’ crude oil gathering system in Oklahoma and Western Kansas remains fully operational, and crude oil disbursements are being handled in a timely manner. Company officials are managing crude supplies through a combination of time trades, storage and resale.
- Some workers at the refinery and the fertilizer facility already are returning to work. Others have been told to remain at home until contacted by their supervisors to return.
- The company is working closely with city, state and federal agencies engaged in mitigating the environmental impact of the loss and is actively reaching out to those people affected.

## **About Coffeyville Resources, LLC**

Coffeyville Resources, LLC is an independent refiner and marketer of high value transportation fuels and a producer of ammonia and urea ammonia nitrate, or UAN, fertilizers. Coffeyville Resources is one of only seven petroleum refiners and marketers in the Coffeyville supply area (Kansas, Oklahoma, Missouri, Nebraska and Iowa) and, at current natural gas prices, the lowest cost producer and marketer of ammonia and UAN in North America. Coffeyville Resources' group of companies includes Coffeyville Resources Refining & Marketing, LLC, a 108,000 BPD oil refinery in Coffeyville, Kansas; Coffeyville Resources Crude Transportation, LLC, a crude oil gathering system serving central Kansas and northern Oklahoma; Coffeyville Resources Terminal, LLC, a refined products terminal in Phillipsburg, Kansas; Coffeyville Resources Pipeline, LLC; and Coffeyville Resources Nitrogen Fertilizers, LLC, which operates a unique coke gasification-based nitrogen fertilizer plant adjacent to the refinery that annually produces over 700,000 tons of nitrogen fertilizer products. Coffeyville Resources generated approximately \$3 billion in combined net sales in 2006. For more information, please visit [www.coffeyvillegroup.com](http://www.coffeyvillegroup.com).
