COFFEYVILLE RESOURCES PROVIDES REFINERY RESTART STATUS
FACILITY COULD RESUME OPERATIONS IN SEPTEMBER

COFFEYVILLE, Kan. (July 18, 2007) -- Coffeyville Resources announced today that operations are expected to resume by mid-September at its refinery that was closed earlier this month by record flooding from the nearby Verdigris River.

During the weekend of June 30-July 1, heavy rains caused the Verdigris River to overflow its banks, top protective levees and flood the town of Coffeyville, including the Coffeyville Resources refinery and nitrogen fertilizer operations.

“We are fortunate that our preliminary assessment indicates there was no major damage to our large, engineered equipment and processing units,” said Keith Osborn, executive vice president and refinery general manager. “However, we had damage to a large number of pumps, motors and control equipment, which taken together require extensive repairs.”

Coffeyville Resources employees supplemented by nearly 1,000 contract workers are on site repairing and replacing equipment damaged by the flood.

Meanwhile, Coffeyville Resources Nitrogen Fertilizers this past weekend successfully restarted its facility. The fertilizer plant is adjacent to the refinery but situated on slightly higher ground and therefore sustained less flood damage. The nitrogen fertilizer plant is expected to begin shipping product to its customers later today.

“Our gratitude goes out to all our employees, contractors and vendors working together to safely bring our operations back to normal,” said Coffeyville Resources Chief Executive Officer Jack Lipinski. “This kind of teamwork, as well as the strong backing we have received from our business partners, customers and our sponsors, is invaluable.”

About Coffeyville Resources, LLC

Coffeyville Resources, LLC is an independent refiner and marketer of high value transportation fuels and a producer of ammonia and urea ammonia nitrate, or UAN, fertilizers. Coffeyville Resources is one of only seven petroleum refiners and marketers in the Coffeyville supply area (Kansas, Oklahoma, Missouri, Nebraska and Iowa) and, at current natural gas prices, the lowest cost producer and marketer of ammonia and UAN in North America. Coffeyville Resources' group of companies includes Coffeyville Resources Refining & Marketing LLC, a 108,000 BPD oil refinery in Coffeyville, Kansas; Coffeyville Resources Crude Transportation, LLC, a crude oil gathering system serving central Kansas and northern Oklahoma; Coffeyville Resources Terminal, LLC, a refined products terminal in Phillipsburg, Kansas; Coffeyville Resources Pipeline, LLC; and Coffeyville Resources Nitrogen Fertilizers, LLC, which operates a unique coke gasification-based nitrogen fertilizer plant adjacent to the refinery that annually produces over 700,000 tons of nitrogen fertilizer products. Coffeyville Resources generated approximately \$3 billion in combined net sales in 2006. For more information, please visit www.coffeyvillegroup.com.
